

With the ultra-portable Cyflais3 whispering system, delegates will no longer require microphones and the translator needs neither earphones nor a soundproof booth.

ID-742 Cyflais3 Simultaneous Translation System

This system is intended for smaller meeting and class rooms where ease of setting-up is and confidentiality crucial. It offers the ultimate in portability and low cost while maintaining reliability and high audio quality.

The Cyflais3 is a discrete hardware system through which a translator communicates in real time to the meeting attendants via small infra-red receiver units built into light weight headsets. The equipment is ideally suited for applications in courts and public meeting facilities such as public meeting committee and board rooms.

Based on the popular Sennheiser SI-30 wide band modulator with integral radiator, the Cyflais3 was developed specifically to support bilingual meetings in small to medium sized rooms and through careful alignment of the radiators throughout the stack, coverage around 180 can be achieved.

With its standard microphone configuration, you can be sure of complete confidentiality with no "radio" emissions leaving the meeting room. An option for a radio microphone is available offering the translator maximum flexibility.

The Cyflais3 offers supports 2 channel operation, which means that with two systems it is possible to provide translation into two languages simultaneously.

The equipment comes complete with a "camera style" carry case as standard, and there are also options for more durable flight cases.

Our engineering consultants would be pleased to discuss your requirements with you, and we invite you to contact our team at info@idbsystems.co.uk, alternatively you can call us on +44 (0) 1492 864 126.

|-------------------------------------|--|
| Power Supply: | Desktop mounting, external 24V, fixed output type. |
| Input Voltage: | 90V AC to 240V AC |
| Translator's Headset: | SURE WH20. A mute cable and radio microphone options are also available. |
| Headsets: | Single Channel – RI-150 Dual Channel – HDI-830 Support is also available for the hard of hearing. |
| Modulator: | SENNEHEISER SI 30 capable of transmitting on two channels which provides for two languages in any single event. The system also includes 3 further Infra-red transmitters which can provide coverage over 180° to a distance of 18 meters at 40dB of signal amplitude. |
| Case Styles: | Standard - Soft carry case. Optional – Flight case |
| Self-Test & Maintenance: | IDB Systems offer a full maintenance service for both headsets and transmitting stack. |
